The Onassis Foundation Science Lecture Series

The Onassis Foundation Science Lecture Series is a series of lectures given by prominent scientists and scholars. The lectures cover a wide range of topics in science, technology, and philosophy. The series is part of The Onassis Foundation's mission to promote scientific knowledge and understanding.

The Onassis Foundation was established in 1963 by the late Aristotle Onassis, a Greek shipping magnate. The foundation has supported a wide range of cultural and educational initiatives, including the Onassis Foundation Science Lecture Series.

The series has been held annually since its inception. Past lecturers have included Nobel Prize laureates such as John F. Nash, Jr. and Peter Medawar. The lectures are open to the public and are held at various locations around the world.

The Onassis Foundation Science Lecture Series is an important contribution to the promotion of scientific knowledge and understanding. It provides an opportunity for scientists and scholars to share their insights and ideas with a wide audience.
